Message from the CHRC Director

Welcome to the Comprehensive Health Research Centre (CHRC)!

A hub of innovation and collaboration at the forefront of health research. Established to pioneer advancements in health promotion, prevention, rehabilitation, and healthcare services, CHRC embodies a commitment to interdisciplinary excellence.

Since our inception in January 2020, CHRC has cultivated a vibrant research community comprising experts from diverse fields such as medicine, nutrition, psychology, epidemiology, and more. Our researchers collaborate seamlessly across disciplines to explore the multifaceted factors influencing health and wellbeing.

At CHRC, we believe in research that transcends boundaries and addresses real-world challenges. Our efforts are geared towards developing innovative strategies for disease prevention, improving healthcare delivery, and enhancing public health policies. By integrating perspectives from academia, healthcare providers, industry, and community stakeholders, we aim to foster sustainable solutions with a global impact.

CHRC operates within a dynamic network of partners, including academic institutions, healthcare facilities, industry leaders, and advocacy groups. Together, we leverage collective expertise to drive meaningful change in health outcomes and societal well-being.

Join us in our mission to redefine health research and innovation. Together, we can shape a healthier future for communities worldwide!

Helena Canhão, MD, PhD

CHRC.

Facts and Figures

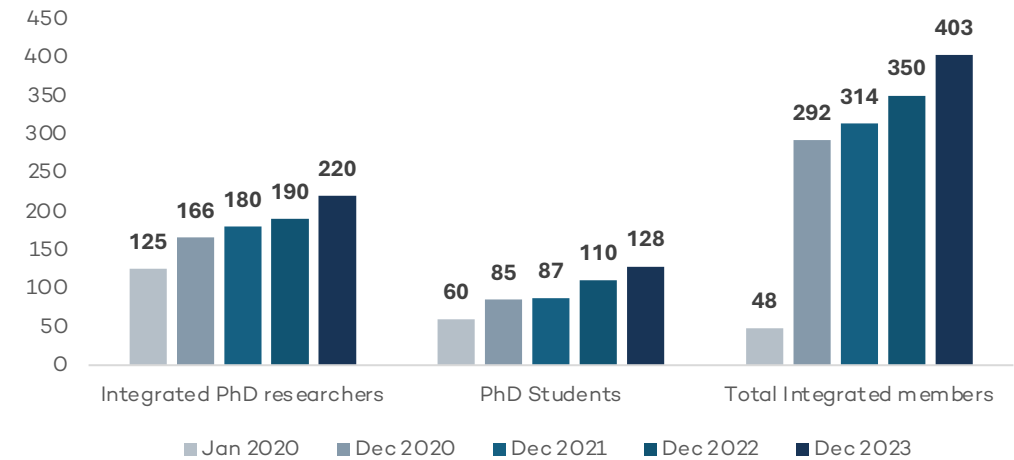

Facts and figures

By the end of December 2023

- 220 integrated PhD researchers
- 128 PhD Students
- 55 integrated non-PhD members

Integrated Members' Evolution (2020-2023)

By the end of December 2023

- 13 Grants awarded
- Total endowment of 320 000€

By the end of December 2023

- 15 PhD Scholarships awarded

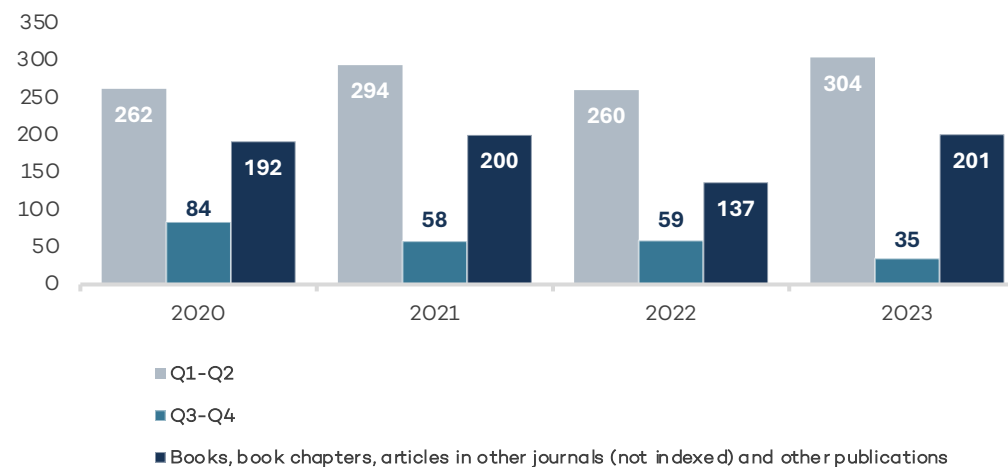

PUBLICATIONS

By the end of December 2023

- 2086 total publications
- 1120 papers published in high impact journals

Publications 2020-2023

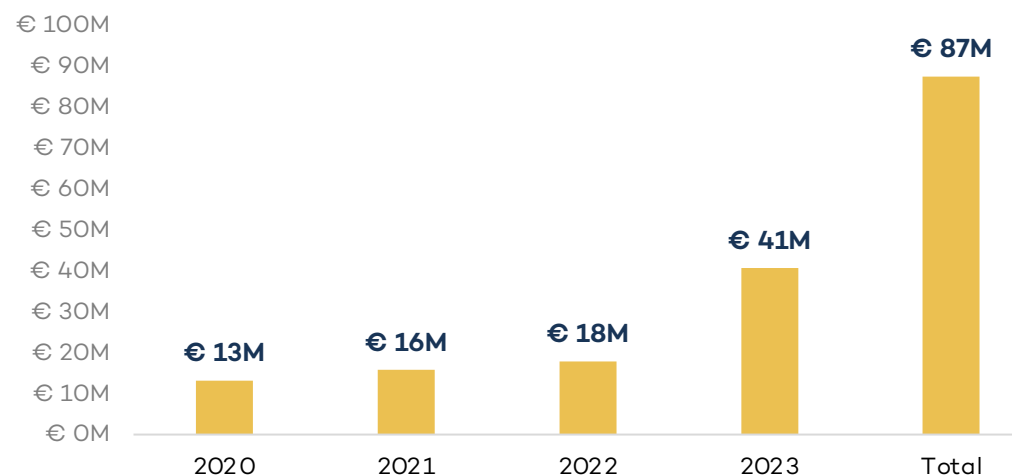

PROJECTS

During the year 2023

- 108 active projects
- 80M € of total amount of funding
- 6M € of funding within the institution
- 41M € in international global funding – an increase of 215% compared to 2020

International Global Funding for Projects by Year (2020-2023)

FUNDING OFFICE SUPPORT

By the end of December 2023

- 230 Grants applications
- 44 events
- 114 scientific publications financial supported by CHRC

NOVACRU SUPPORT

By the end of December 2023

- The development and implementation of 1076 studies were supported by NovaCRU (64% international)

SCIENTIFIC KNOWLEDGE TRANSFER

By the end of December 2023

- 15 Patents and 16 Prototypes and Software

ANNUAL SUMMITS

By the end of December 2023

- 4 CHRC Annual Summits (November 2020, May of 2022, November 2022, May 2023)

CHAIN BIOBANK

By the end of December 2023

- Stores more than 3000 samples from 11000 participants, including blood, serum, plasma, urine and bones

CHRC.

About CHRC

About CHRC

The Comprehensive Health Research Centre (CHRC) is a cutting-edge centre at the forefront of health research and innovation. CHRC was officially established in Jan. 2020, coordinated by NOVA Medical School/NMS in collaboration with 4 other management partners: National School of Public Health, Évora University, Hospital de Santo Espírito, Azores and Lisbon Institute of Global Mental Health. It started with 125 integrated PhD Researchers, 60 PhD students and 48 integrated non-PhD members. In Dec.2023, CHRC gathered 220 integrated PhD Researchers, 128 PhD students and 55 integrated non-PhD members. Over 2018-2023, CHRC created a strong research community, increasing by 76% the integrated PhD researchers. CHRC includes researchers from medicine, nutrition, rehabilitation, public health, nursing, psychology, epidemiology, statistics, economy, engineering & data science, each bringing unique and complementary scientific background and expertise. Integrating knowledge from various disciplines, research efforts are focused on understanding the causes and mechanisms of health issues and developing innovative strategies for prevention, diagnosis and treatment. The centre operates within an ecosystem of 29 institutions, including academia, hospitals, health centres, companies, patient and caregiver advocates, non-profits, and governmental agencies. CHRC coordinates the Academic Clinical Centre of Lisbon (CCAL), the Associated Laboratory REAL, and integrates two CoLABs: CoLABTrials and ValueforHealth.

ORGANISATION

CHRC established a governance framework centred on an Executive Committee and on the Executive and Management office, ensuring the organisation's effectiveness and sustainability. The organisational structure of the CHRC Executive Committee is led by Helena Canhão, who holds the position of Coordinator. Under her coordination, the committee comprises Rute Dinis de Sousa as the Executive Director, Sónia Dias representing the National School of Public Health (ENSP), Armando Raimundo representing the University of Évora (U Évora), and Ana Maria Rodrigues representing Thematic Lines. Each member has an equal and specific role within the committee, ensuring a clear and organised leadership structure within the CHRC.

CHRC offers three different platforms for technical and administrative assistance:

- **Executive and Management Office** – aims to manage day-to-day operations, coordinate and manage technical and administrative teams; control costs; prepare regular performance reports; supervise communication and dissemination initiatives and implement best management practices; develop and disseminate the Unit's strategy and mission to all members and technical and administrative teams, and promote fundraising.
- **Funding Office** - aims to boost researchers fundraising by helping them to know and prepare proposals for applying for national, international, and structural funding.
- **Communication Office** – aims to ensure the communication and dissemination of information between the management units of CHRC, and all external stakeholders – partners and peers from scientific community, as well as civil society (initiated in 2023); to provide visual support (image and video) for various initiatives, delivering a strong and attractive image to the targeted public.

ORGANISATION

CHRC executive committee

Helena Canhão
Coordinator

Platforms for Technical and Administrative Assistance

RESEARCH SUPPORT INFRASTRUCTURE – TECHNICAL

The CHRC's Technical Support Departments include the Cochrane ENSP-NMS Centre, the CHAIN Biobank, the Clinical Trials Unit (NovaCRU), the Physical Fitness Assessment Lab, the Kitchen Lab, the Data Centre, and the Pre-Clinical Research Support Centre.

- 1. Cochrane Centre:** Located in ENSP, it focuses on promoting evidence-based health decisions through systematic reviews and educational initiatives. In 2025 we will expand this infrastructure and will have another cochrane site at NOVA Medical School to boost the quality of systematic reviews among CHRC researchers.
- 2. CHAIN Biobank** supports researchers through the collection, processing and quality control of a wide range of human biospecimens (solid and fluid) and associated health data. It is composed by 3 labs: BLS2 biosafety lab; freezers rooms; sample processing and quality control lab that offer services of DNA and RNA extraction, cell culture, flowcytometry and microscopy working in collaboration and in coordination with the pre-clinical research support Centre. Presently it stores more than 30000 samples from 11000 participants, including blood, serum, plasma, urine and bones
- 3. Nova-CRU** is the clinical trials unit located at NOVA Medical School. Its expertise in the development of clinical research protocols, regulatory requirements, monitoring and management, support the development of investigator initiated clinical trials. It articulates with PtCRIN, the national scientific partner of ECRIN-ERIC, which can support national investigators seeking to internationalize clinical trials, and, on the other hand, to involve CHRC in clinical trials initiated by investigators in other European countries
- 4. The Physical Fitness Assessment Laboratory** at UE is equipped with a DXA to assess body composition, an isokinetic dynamometer to assess muscle strength, and force platforms to analyse the biomechanics of gait and balance, among other features and was turned available to CHRC community in 2023.

RESEARCH SUPPORT INFRASTRUCTURE – TECHNICAL

- 5. Kitchen Lab** is located at NOVA Medical School and hosts nutrition research studies, education, training and community activities. In 2023 this lab was made available to CHRC research community.
- 6. Methods and data analysis office:** This office started in 2021 and assisted researchers and research groups with quantitative and qualitative methods of data analysis. The office began by setting up its structure and work model, conducting surveys among researchers to identify commonly used methodological approaches and to assess their training needs in data collection and analysis techniques. For the next 4 years this office will grow and will have one delegation in each management unit. This Office will grow and will be named DATA CENTER. This infrastructure will be dedicated to enhancing data collection, storage and analysis of large-scale epidemiological and clinical studies, supporting research and development. It will provide high performance data analytics and artificial intelligence using local supercomputer facilities (e.g. the OBLIVION Supercomputer and the VISION and ORION Clusters); CHRC will establish a protocol with the High Performance Computing Chair of UE to use this structure as a data collection, storage, management and processing platform, according with FAIR principles, so all CHRC projects' data will be centralized. Researchers will be supported by 3 FTE specialized in quantitative methods, statistical and epidemiological analyses

METHODS AND DATA ANALYSIS OFFICE

This office, by 2023, carried out the following activities:

- 53 CHRC research projects supported in the design, planning, data analysis, and/or dissemination of findings
- Launched the “Meet the Methods” meetings
- Launched the Methodological Workshops, with a training of 19 researchers on qualitative data analysis with MaxQDA
- Developed occasional lecturing activities in MSc and PhD methods courses
- Planned and prepared the pedagogical materials for the quantitative and qualitative methods courses of the CHRC PhD programme “Well-being, Health Sciences and Technologies”
- Launched a survey of the main methodologies used by the 21 research groups of the research groups of the CHRC
- Preparation of the future CHRC DATA CENTER

58

Actions developed

EDUCATION AND TRAINING OFFICE

The Education and Training Office started its activity in 2021 by establishing its priorities for the current triennium. First, it aims to build a community of practice among CHRC members. Second, it aims to create opportunities for lifelong development of CHRC members. Third, it supports the development of innovative, competitive post-graduate training programmes, streamlining the cooperation among involved institutions and international institutions. Among the three academic institutions of the CHRC (NMS, ENSP, and UÉ), the CHRC offers 8 Collaborative Postgraduate Training Programmes

CHRC's Collaborative Postgraduate Training Programmes:

1 a postgraduate degree

4 master's

3 doctorates

- Digital Health Executive Course - ENSP and NMS <https://www.ensp.unl.pt/courses/postgraduate-courses/digital-health-executive-course/>
- Master in Clinical Research Management (MEGIC) – NMS and ENSP <https://www.ensp.unl.pt/courses/in-association/clinical-research-management/>
- Master in One Health: Human and Animal Public Health - UÉ and NMS <https://www.uevora.pt/en/study/courses/master-degrees?cod=MA97>
- Master in Physiotherapy – Musculoskeletal Conditions - ENSP and NMS <https://www.ensp.unl.pt/courses/in-association/physiotherapy/>
- Master in Epidemiology, Biostatistics, and Health Research (EPIBIS) – ENSP and NMS <https://www.ensp.unl.pt/courses/masters/epidemiology-biostatistics-and-health-research/>
- PhD in Global Public Health - ENSP and NMS <https://www.ensp.unl.pt/courses/in-association/global-public-health/>
- PhD in Health and Wellness Sciences and Technologies - NMS, ENSP and UÉ <https://www.uevora.pt/en/study/courses/doctoral-degrees?cod=PA53>
- PhD in Erasmus Mundus PHOENIX EM JDP Dynamics of Health and Welfare – ENSP and UÉ <https://www.ensp.unl.pt/cursos/doutoramentos/dynamics-of-health-and-welfare/>

EDUCATION AND TRAINING OFFICE

By 2023, this office carried out the following activities:

I. Training Needs Assessment and Development:

- An e-mail for the office was created: training@chrc.pt
- Conducted surveys to assess training needs of CHRC researchers and staff.
- Developed and implemented training actions based on survey results:
 1. Mixed Methods – Integrating Quantitative and Qualitative Methods (October 12, 2022)
 - ✓ 4-hour course, organised by Mário Santos, with 8 participants.
 2. Untangling Funding Applications for European Opportunities (December 12, 2022)
 - ✓ 8-hour course, organised by Rui Raimundo and Rita Rua Ferreira, with 8 participants.
 3. Training in Teamwork and Conflict Management (June 28, 2023)
 - ✓ 4-hour online course, organised by Raquel Santos, with 25 participants.
- Sent course evaluation surveys, receiving positive feedback with participants likely to recommend the courses.

7

Training Actions promoted

EDUCATION AND TRAINING OFFICE

II. Support for Training Activities:

- Launched a call for financial and logistical support to organise training activities, providing €1,500 in funding for each activity.
- Received six applications, funded five, and carried out four training activities.
- Activities included:
 - 1.** Interoception: Advanced Assessment and Intervention in Health (September 19, 2023)
 - ✓ Workshop with Prof. Cynthia Price, involving 21 participants.
 - 2.** International Graphonomics Society 2023 Conference (IGS23) (October 17-19, 2023)
 - ✓ Conference on fine motor control research, with 57 participants.
 - 3.** Systematic Reviews and Meta-Analysis Workshop (November 29, 2023)
 - ✓ Workshop on advanced systematic review methods, with 9 participants.
 - 4.** Pets as Sentinels of Human Exposure to Environmental Contaminants (December 15-16, 2023)
 - ✓ Conference on pets as data sources for human exposure to contaminants, with 39 participants.

CHRC.

Research streams

Research streams

The versatility of CHRC, which gathers a diverse range of professionals from fields such as medicine, nutrition, rehabilitation, public health, nursing, psychology, epidemiology, statistics, economics, engineering, and data science, allows for a multidisciplinary approach to understanding and addressing health issues. Dedicated to producing evidence-based innovative strategies for prevention, treatment, and healthcare delivery, CHRC concentrates its efforts on five principal fields, each with various subthemes.

THEMATIC LINES AND RESEARCH GROUPS

CHRC.

CHRC's Uniqueness

CHRC's Uniqueness

UNIFIED RESEARCH: CHRC'S INTERDISCIPLINARY STRENGTH

The CHRC exemplifies exceptional interdisciplinary integration on complex topics, such as cancer. This reflects the centre's robust capability to bring together researchers from various fields—including public health, medicine, sports, nursing, and mental health—each contributing unique insights and approaches. By leveraging their diverse expertise, CHRC researchers collaboratively tackle cancer-related challenges, fostering innovative solutions and advancing our understanding of the disease. This holistic approach not only enhances problem-solving efficiency but also promotes the development of comprehensive strategies for cancer prevention, diagnosis, and treatment. For instance, public health experts might focus on cancer prevention through lifestyle interventions, while medical professionals work on improving diagnostic techniques and treatment protocols. Simultaneously, specialists in sports and physical activity explore rehabilitation programmes, nursing professionals contribute to patient care improvements, and mental health experts address the psychological impacts of cancer.

CHRC'S IMPACT IN CPLP: ADVANCING COLLABORATIVE HEALTH INITIATIVES

The work conducted within the CPLP (Community of Portuguese Language Countries) highlights the CHRC's significant contributions to this area. Examples include the projects titled “Nutritional and Food Surveillance System in São Tomé and Príncipe” and “Weaving Ties: Initiatives to Strengthen Professional Training in Ibero-American and African Nursing,” both of which involved collaboration with the National School of Public Health. The agenda with the WHO (World Health Organization) for the CPLP further underscores this focus.

Beyond its projects, the CHRC is deeply committed to knowledge transfer and capacity building within the CPLP. This dedication is exemplified by its participation in a consortium funded by the FCT to offer PhD scholarships in Public Health to CPLP students, and its longstanding collaboration with healthcare institutions in Angola to provide training in health management and occupational medicine.

By spearheading projects and providing concrete examples within the community, the CHRC demonstrates its key role in the CPLP. This includes initiatives aimed at addressing public health challenges, fostering collaborative research, and implementing programs that benefit the member countries of the CPLP.

EMPOWERING TOMORROW: SOCIAL INNOVATION AND SCIENTIFIC KNOWLEDGE

Social innovation, including services like social prescribing and treatments, and the transfer of scientific knowledge through patents, prototypes, and software, are crucial for societal advancement. Social innovation addresses complex societal issues by integrating various sectors to improve well-being and quality of life, while scientific knowledge transfer accelerates technological progress and practical applications. Together, these efforts drive sustainable development, enhance public health, and foster a more equitable and efficient society by turning innovative research into tangible benefits for communities.

The CHRC's social prescribing project, led by the National School of Public Health (ENSP NOVA), exemplifies its dedication to social innovation by integrating healthcare with community support to improve well-being. This project tackles modern health challenges such as sedentary lifestyles, poor diets, social isolation, economic difficulties, and discrimination through personalized interventions like lifestyle promotion, social activation, and cultural participation. By fostering cross-sector collaboration, providing consultancy, and training professionals, this initiative strengthens ties between healthcare and community resources, addressing non-clinical social needs and promoting sustainable, inclusive health solutions.

EMPOWERING TOMORROW: SOCIAL INNOVATION AND SCIENTIFIC KNOWLEDGE

In another example of CHRC's contribution to social innovation, with the Saúde.come project, CHRC researchers collaborated with the three major TV operators in Portugal to develop a TV application available to all study participants through a dedicated channel. The programme aimed to promote healthy lifestyle behaviours among older individuals experiencing food insecurity through a 12-week home-based intervention using the transtheoretical model of behaviour change. This digital tool underwent a successful small-scale pilot, demonstrating high acceptability and showing short-term positive effects on clinical outcomes such as fatigue, physical function, and activity among senior citizens. The Saúde.come content is also accessible as an e-book and has been included in the digital health literacy library by the general health directorate, underscoring its value in health promotion in Portugal. This open-source and free tool, accessible

31

Older adult individuals with food insecurity enrolled in the 12-week intervention programme with no dropouts

17

Primary healthcare centres in Portugal were involved in the selection of the 31 participants

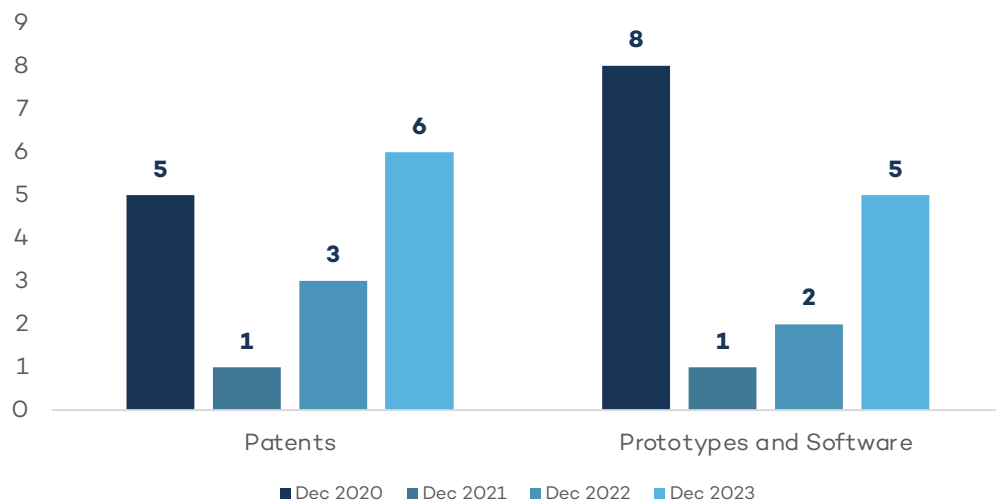

The intervention programme not only reduced the proportion of older adults with food insecurity but also improved participants' fatigue and physical function

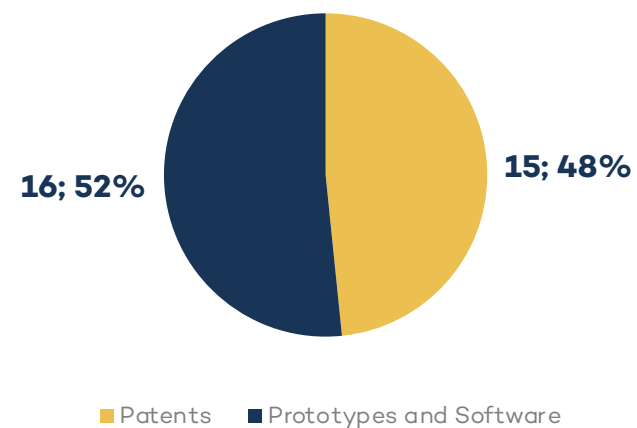

EMPOWERING TOMORROW: SOCIAL INNOVATION AND SCIENTIFIC KNOWLEDGE

Between January 2020 and December 2023, CHRC researchers contributed to the transfer of scientific knowledge by developing 15 patents and 16 prototypes and software, distributed as follows:

Scientific knowledge transfer
(Jan 2020 - Dec 2023)

Distribution of Scientific knowledge transfer
(Jan 2020 - Dec 2023)

CHRC'S MEMBERS MAIN CONTRIBUTIONS

Our researchers significantly advanced and translated scientific knowledge, prompting societal impact in various areas. The five most relevant CHRC projects for the 2020-2023 period, summarised below, cover the following topics: musculoskeletal, cardiac, and health promotion (including mental health and healthy aging) and also report contributions in the management of the COVID-19 pandemics.

MUSCULOSKELETAL CONDITIONS

- Reuma.pt
- EpiReumaPt
- 12-Week Aquatic Exercises Intervention for Women with Rheumatoid Arthritis (RA)
- 24-Week Interactive Cognitive-Motor Programs
- Respiratory Muscle Training (RMT) for Women with Fibromyalgia (FM)

CARDIAC DISEASES

- PORTHOS Study
- RCT on High-Intensity
- Interval Training (HIIT) and Moderate-Intensity Continuous Training for Coronary Artery Disease (CAD) Patients
- Remote Patient Monitoring System for Cardiac Surgical Patients

HEALTH PROMOTION

- Project Mais
- PAFSE (Partnerships for Science Education)
- ELEVATE
- Mental Health Rights Protection and Peer Support
- IoMum Prospective Coh
- MenosSalPortugal.ptort Study
- Saude.come TV App

PUBLICATIONS

During the period 2020-2023, CHRC presented a total of 2,086 publications, with 382 of them published in open access in 2023. More than a half of this number (1120) corresponds to scientific articles published in high impact journals (Q1 or Q2 - SCOPUS index). From December 2020 to December 2023, there was a 16.03% increase in the publication of scientific articles in high-impact journals.

CHCR researchers published 236 Articles in peer-reviewed journals Q3 and Q4 (SCOPUS index). Regarding books, book chapters, articles in other journals (not indexed) and other publications, CHRC registered 730 existences.

COMMUNICATION OFFICE

The CHRC's Communication Office had its first trial kick-off in June 2021, and its aim is to ensure the communication and dissemination of information between the management units of CHRC, and all external stakeholders – partners and peers from scientific community, as well as civil society. CHRC's website was launched in 19th November of 2021 and has been regularly updated since then.

Regarding all the publications released by this office:

INTERFACE WITH SOCIETY

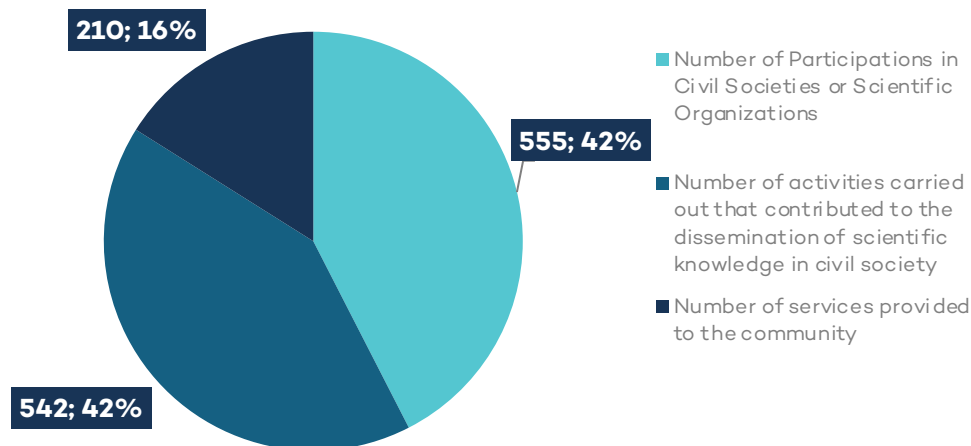

The CHRC is strongly committed to the tangible impact of the research in its translation into public policies and civil society, as well as in the provision of services to the community.

From January 2020 until December 2023, CHRC researchers actively participated in 555 civil society or scientific organisations, carried out 542 activities that contributed to the dissemination of scientific knowledge in civil society, and provided 210 services to the community. Additionally, CHRC integrated members made more than 2000 contributions to the media.

CHRC Researchers' Engagement with Society
(Jan 2020 - Dec 2023)

Distribution of CHRC Researchers' Engagement with Society (Jan 2020 - Dec 2023)

CHRC ANNUAL SUMMITS

The CHRC's Annual Summits aim at enhancing communication between members and management units to boost and promote clinical, public health, and health services research of a collaborative and multidisciplinary character. By the end of December 2023, 4 Annual Summits were carried out:

- **1ST CHRC ANNUAL SUMMIT** - 19th and 20th of November 2020 – it brought together about 120 participants, members of the CHRC, simultaneously, and offered 5 conferences, 4 round tables, 20 presentations of CHRC projects. Due to the pandemic situation, this Summit was carried out in an online format.
- **2ND CHRC ANNUAL SUMMIT** - The second CHRC Annual Summit was planned to take place online on 19th November and in face-to-face on 20th November, in the city of Évora. Unfortunately, the COVID-19 infection situation prevented the work from taking place in person, so the first day of the online summit was kept. The second day of the summit was postponed and is scheduled for May 13, 2022, at the Colégio Espírito Santo in Évora, hosted by University of Évora. On the 19th November, online, there were 96 different participants throughout the afternoon, 63 participants simultaneously in the top share. Regarding international participation, there were participants from Brazil and the Netherlands. There were 12 speakers involved in 9 communications in total.
- **3RD CHRC ANNUAL SUMMIT** - took place face-to-face in Lisbon on the 3rd and 4th of November, 2023, joining 153 CHRC members on both days. In addition, there were participants from the United States of America, Canada, and the United Kingdom regarding international participation. Six distinguished speakers presented five high-level keynote speeches. Of the submitted scientific works, ten oral communications were also presented, with the works best quoted by the Scientific Committee of the event, and 46 posters were exhibited.
- **4TH CHRC ANNUAL SUMMIT** - took place face-to-face in Évora on the 25th and 26th of May, 2023, joining 162 CHRC members on both days. Six distinguished speakers presented four high-level keynote speeches. Of the submitted scientific works, 31 oral communications were also presented, with the works best quoted by the Scientific Committee of the event, 38 posters were exhibited and more than 24kg of the leftover food was given to Refood, as the CHRC Annual Summit, in addition to health, is committed to sustainability and the fight against waste.

CHRC.

Collaborative activities within the CHRC

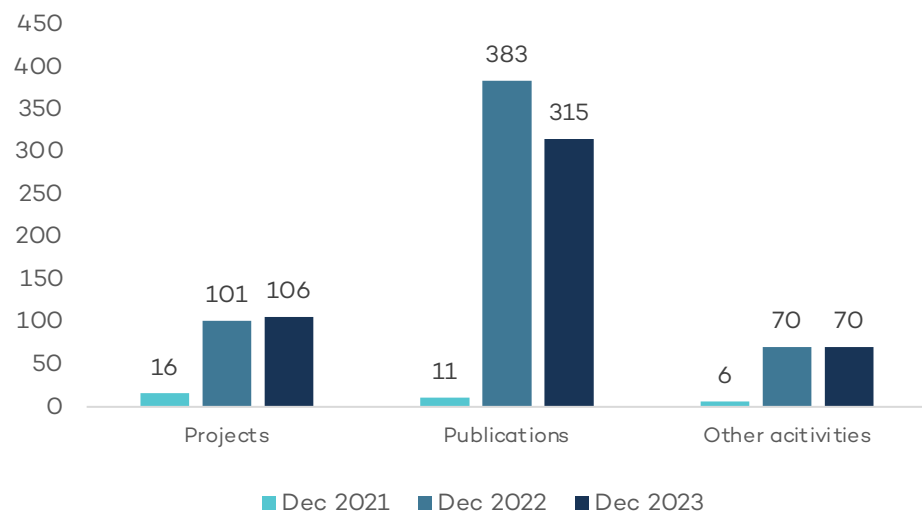

Collaborative activities within the CHRC

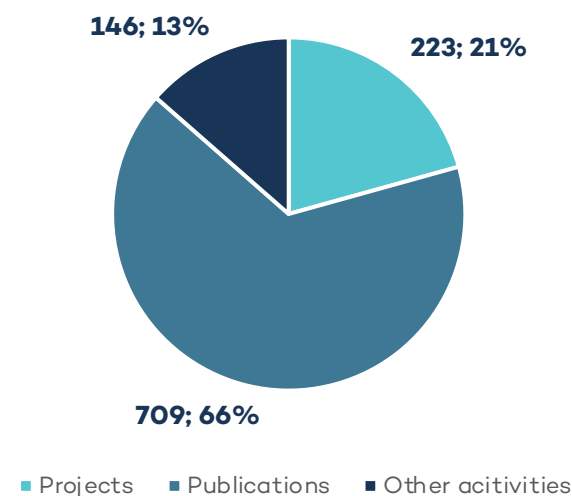

Collaborative activities within the CHRC are crucial for advancing science and healthcare. With a diverse range of management institutions specializing in fields such as nursing, sports and health sciences at the University of Évora, medicine at the NOVA Medical School (NMS), public health at the National School of Public Health (ENSP), and mental health at the Lisbon Institute of Global Mental Health (LIGMH), the CHRC promotes a multidisciplinary approach to research and innovation, enabling comprehensive insights into complex health issues.

Therefore, from January 2021 to December 2023, CHRC integrated members actively engaged in numerous collaborative initiatives across its management institutions (NMS, ENSP, UÉ, LIGMH, and HSEIT). These efforts encompassed over 223 collaborative projects, 709 collaborative publications and 146 other collaborative activities.

Internationalization

Internationalization

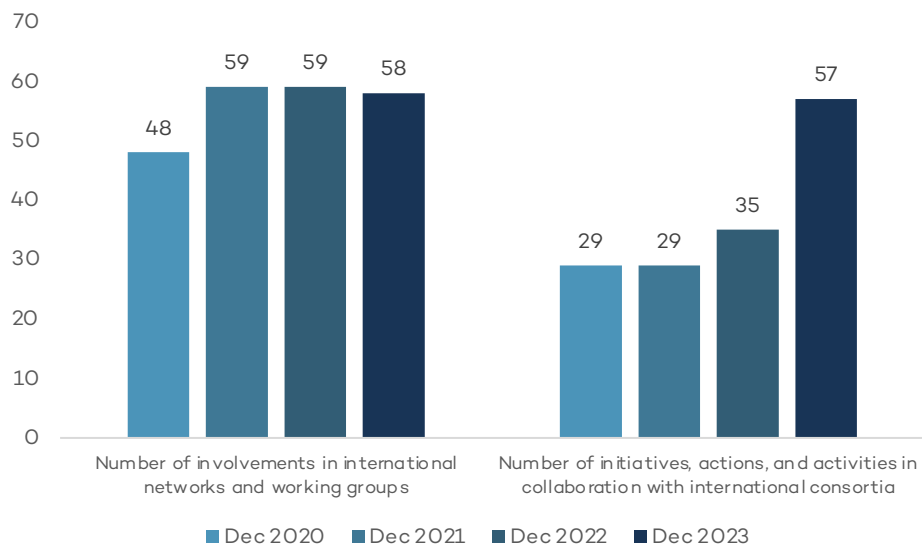

The internationalization capacity of CHRC plays a pivotal role in its role as a research and development centre in healthcare. By actively engaging in global networks, working groups, and collaborative initiatives, CHRC enhances its capability to address complex health challenges on a broader scale. This international collaboration fosters exchange of knowledge, best practices, and innovation across borders, facilitating advancements in healthcare research and application. Through partnerships with international consortia at both European and global levels, CHRC leverages diverse perspectives and expertise, ensuring its research efforts are impactful and relevant in a rapidly evolving global health landscape.

CHRC's commitment to integrating global perspectives into its research and development endeavours is evident through its involvement in 224 networks and working groups, as well as 150 collaborative initiatives, actions, and activities with international consortia across Europe and globally from January 2020 to December 2023. These activities encompass all thematic lines within CHRC, illustrating its extensive engagement in collaborative efforts on an international scale.

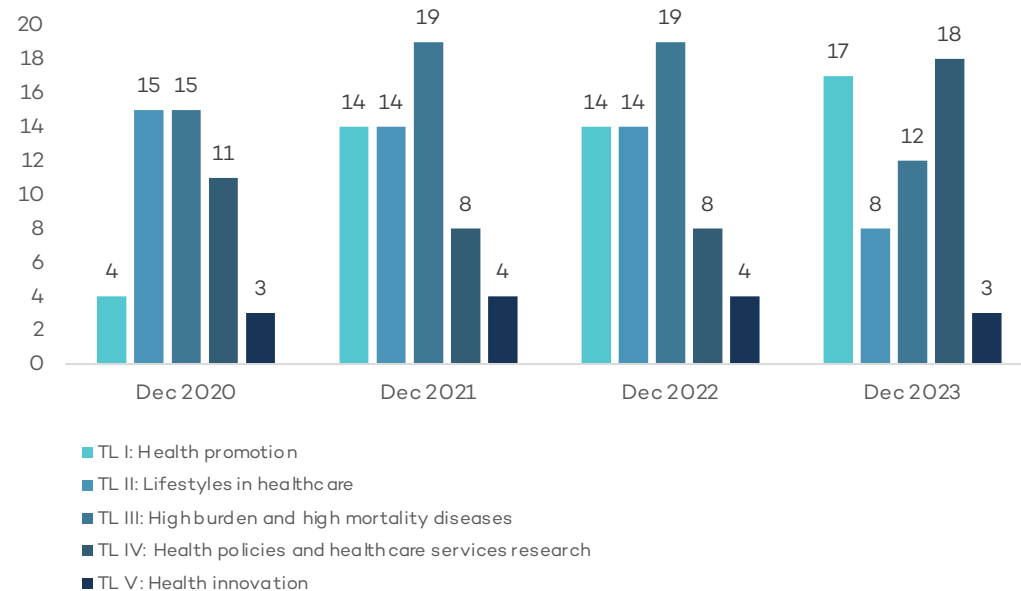

KEY INTERNATIONAL NETWORKS AND WORKING GROUPS WHERE CHRC'S RESEARCHERS HAVE BEEN INVOLVED SINCE JANUARY 2020:

1. **EUPHA** (European Public Health Association)
2. **European Environment Agency**
3. **ISES Europe** (Europe Regional Chapter of the International Society of Exposure Science)
4. **International Nursing Network**
5. **EIT Health** (European Institute of Innovation and Technology Health)
6. **EIP-AHA** (European Innovation Partnership in Active and Healthy Aging)
7. **RIPRES** (International Research Network on Social Representations in Health)
8. **ESRS** (European Sleep Research Society)
9. **EULAR** (European Alliance of Associations for Rheumatology)
10. **ECRIN** (European Clinical Research Infrastructure Network)
11. **BBMRI-ERIC** (European biobanking research infrastructure)
12. **ASPHER** (Association of Schools of Public Health in the European Region)
13. **WHO** (World Health Organization)
14. **EHMA** (European Health Management Association)
15. **GARD-WHO** (Global Alliance Against Chronic Respiratory Diseases)
16. **ICPHR** (International Collaboration for Participatory Health Research Collaborative Projects)
17. **EGPRN** (European General Practice Research Network)
18. **MeNu** (Mediterranean Nutrition Group)
19. **ARIA** (Allergic Rhinitis and its Impact on Asthma)
20. **ENMESH** (the European Network for Mental Health Service Evaluation)

Internationalization of CHRC Collaborative Engagements (Jan 2020 - Dec 2023)

Involvements in international networks and working groups by Thematic Line (Jan 2020 - Dec 2023)

Distribution Involvements in international networks and working groups by Thematic Line (Jan 2020 - Dec 2023)

CHRC.

**Providing
high-level Doctoral and
Postdoctoral training**

Providing high-level Doctoral and Postdoctoral training

Doctoral students and postdoctoral researchers are pivotal for a research centre, driving innovation and advancing knowledge. They bring fresh perspectives and creativity, fostering a dynamic research environment. Supervision by experienced doctoral-level researchers provides crucial mentorship, guiding young researchers in rigorous academic standards and critical thinking. This collaboration enhances research output and cultivates future leaders in academia and industry, contributing significantly to the centre's success and reputation.

Between January 2020 and December 2023, CHRC's doctoral-level integrated members supervised doctoral students and postdoctoral researchers annually as follows. Between December 2020 and December 2023, there was a 80,91% increase in the number of PhD students supervised.

Supervision of PhD Students and Post-Doc Researchers (2020-2023)
